

Waste

All used baits are collected in waste container and re-bagged for use of burrow baiting.

Gloves the use of nitrile gloves are used for mole catching and as such are not hazardous and can be disposed of at recycling centre a transfer note maybe required

Gloves for baiting are re-useable, this cuts down on waste. When at end of use can be washed and can be disposed at recycling centre a transfer note maybe required.

All plastic containers, sacks etc are cleaned, rinsed and labels removed after use. They are then classed as non-hazardous and can be disposed at recycling centre, a transfer note maybe required.

All tubes are taken to recycling centre and a transfer note is always required.

Cardboard is taken to the recycling centre a transfer note maybe required but always go to the office and check.
